Art Unit: 2141

1. This application is in condition for allowance except for the following formal matters:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Newly submitted claims 8 and 19-36 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1-7 and 9-21, drawn to remote data accessing, classified in class 709, subclass 217.
- II. Claims 8, and 22-36, drawn to computer network resource allocating, classified in class 709, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as computer network resource allocating, i.e. network bandwidth allocation. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 8 and 22-36 are withdrawn from

Art Unit: 2141

consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
